## User Recommendations

- Ideal for outdoor areas, front and back porches, decks, patios, garages, driveways, cluttered areas, indoor security applications, stairways, attics and workshops.

## Overview

The HPM PAR38 PIR Sensor LED 28W 2200lm Warm White Twin Flood Light is a versatile lighting solution featuring dual lights that can be independently positioned to illuminate different areas. Ideal for secluded walkways and driveways, the PIR sensor automatically activates the lights when motion is detected within the detection range, enhancing security and convenience.
