Garden Lighting Black

REF. RGLTR60

1 Year Warranty

> [Visit product online](#)

Features

- 12 Volt Transformer
- Fitted with a self resetting thermal overload protection
- IP56 rating

User Recommendations

- To select the right transformer, simply add up the total wattage of your garden lights and choose the next highest rating. For example, 10W + 20W + 10W + 10W = 50W.

Overview

The HPM 12V a.c. 60VA Transformer for Garden Lighting with Self Reset Thermostat is essential for garden lighting installations. This transformer reduces 240V mains voltage to 12V for HPM D.I.Y. garden lights. Ideal for maintaining efficient and safe garden lighting setups.
